Colour options available for:

Main slide structure:	✓
Climbing Grips:	✓
Abacus Plates:	✓
Liana rope set:	✓

2x Open Slide

Two stainless steel slides starting from 2 m high offers an exciting descent that builds balance, spatial awareness, and core strength. Kids can race down using both slides.

Access Route with Grips & Rope

Equipped with climbing grips and reinforced rope, this access route develops strength, coordination, and problem-solving. Kids learn to navigate vertical movement while taking turns and supporting one another.

Access Route with Steel Bars

Colorful stainless steel bars challenge children's balance, focus, and body control. The open design encourages anticipation and interaction, adding a social element to physical play.

Top Platform

This transition space connects climbing and sliding. Children pause here to observe, plan, and interact with others. It supports social play and decision-making before continuing the activity flow.

Abacus Play

HDPE spinning panels on a horizontal bar allow kids to explore motion and patterns. The tactile experience supports motor skills and encourages collaborative or parallel play.

Liana ropes set

Three sturdy ropes suspend a round HDPE disc beneath the slide platform, creating a playful spot to sit, sway, or gather with friends. Balancing on the seat develops core strength, coordination, and spatial awareness.
